E-SMART CLOUD APP

PAIRING INSTRUCTIONS FOR ALL ELEMENT4
ELECTRIC FIRES

1 THE E-SMART CLOUD APP

The E-smart Cloud app gives you full control over your Element4 fireplaces.

1.1 INSTALLING THE E-SMART CLOUD APP

The E-smart Cloud app can be used with all mobile android and apple iOS systems.

Using the iOS App store or Google play to search for 'E-smart Cloud' and select the app by Kaspars Markvarts. See [Figure 1.1](#).

1.2 PAIRING THE APP WITH YOUR FIRE

When you have installed the app it needs to be paired to the fireplace. Please follow the following instructions to pair them.

1. Make sure the fireplace is turned on.
2. Go to the Wi-Fi settings on your phone and look for the network of your fireplace. The name would be 'Esmart' with a 5-digit number. for instance: **Esmart94921**
3. Connect to the network. You can ignore the notification that the network has no internet acces.

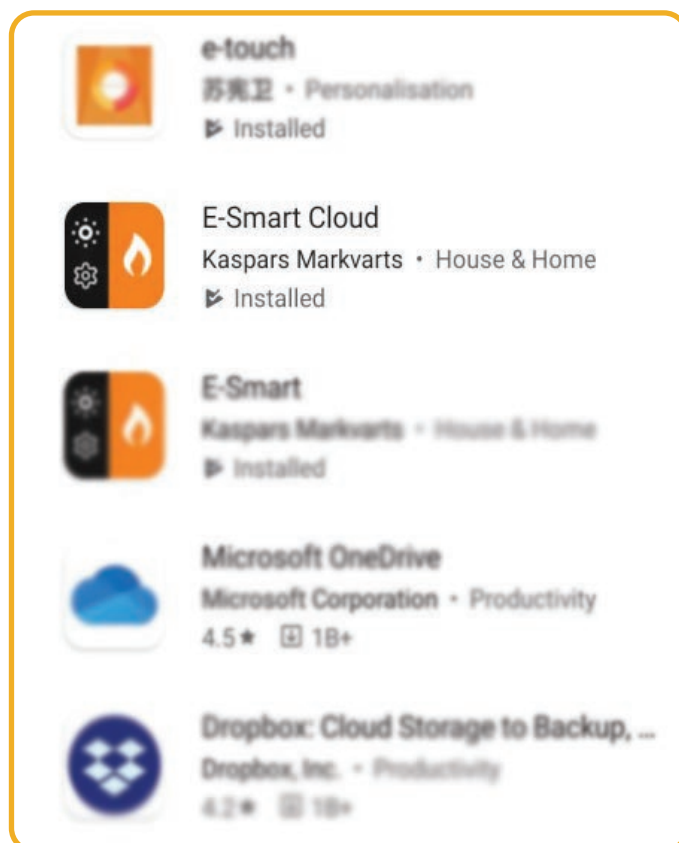

Fig. 1.1 | The app in the App store

4. Open the E-smart Cloud app, You should see your fireplace like in Figure 1.2. Press the menu button (or in some cases a cog icon) in the bottom left corner to open the settings.
5. Use the settings to change the name of the fireplace. **Attention:** The name of the fireplace cannot contain any number or special characters, use only letters. If you have mutiple firepalces please make sure they all have a unique name.

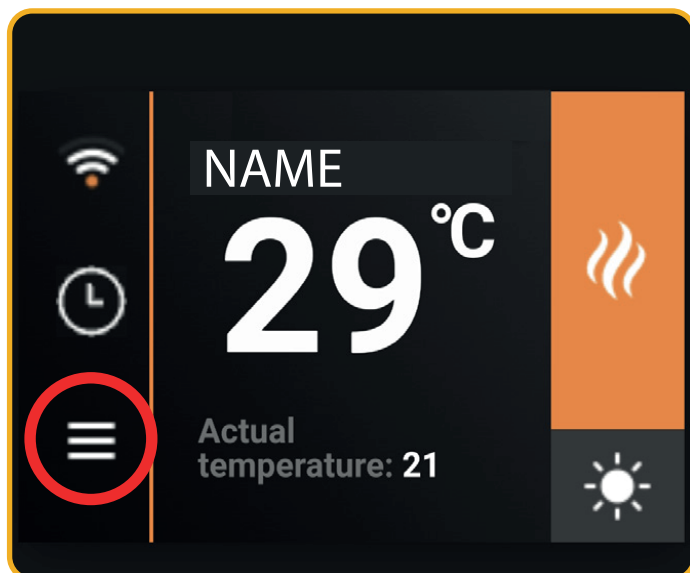

Fig. 1.2 | Main menu with the settings button

6. Scroll down in the settings menu and press the **IoT** button.
7. Create a new account by filling in your email address and creating a password or use the same as for your already installed fireplaces. **Attention:** Make sure your password is easy to remember and contains no special characters.
8. Press 'save' to set your fireplace name and log in information.

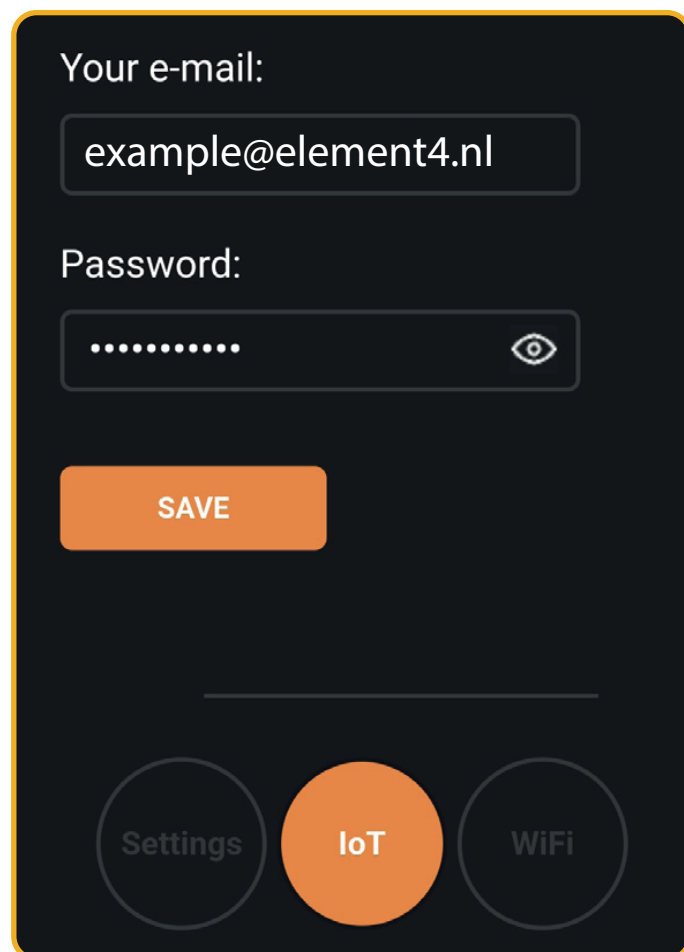

Fig. 1.3 | Creating a new account

9. Press the circle with the text 'Wi-Fi' at the bottom of the page.
10. Look for your home Wi-Fi network and fill in the password like in Figure 1.3. **Attention:** Your Wi-Fi cannot contain be more than 20 characters

OTHER OPTIONS

Select the name (SSID) of your WiFi:

SAVE AND CONNECT

Fig. 1.4 | Selecting the home Wi-Fi

11. Press 'save and connect' to connect the fireplace to the network. .
12. The flames will stop and the left side of the fireplace will have white light. This indicates the fire is connecting to the network.
13. Fully close the app when the flames start again. Make sure it doesn't continue running in the background.
14. After restarting the app it should show your fireplace, this may take a few minutes.

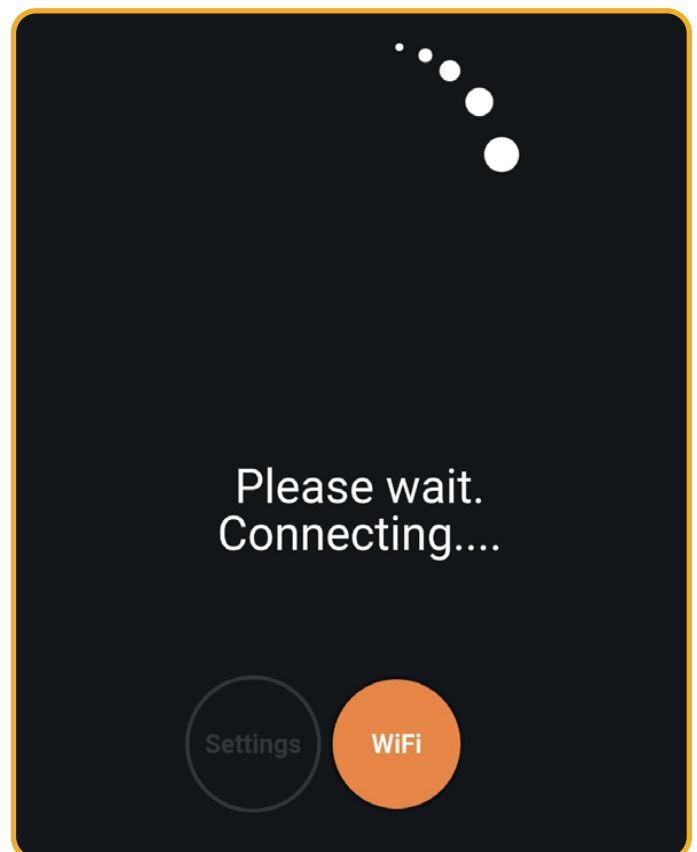

Fig. 1.5 | Connecting to the home Wi-Fi

2 USING THE E-SMART CLOUD APP

Inside the app you will find an overview of the connected fireplaces. For each fireplace you will see the name you gave it in the top, the target temperature in the middle and the actual temperature below.

On the left you will see a number of symbols. The cog at the bottom is the settings menu to change the Wi-Fi settings and the temperature units used. The clock symbol is for the timer settings, see **CHAPTER 2.2** for instructions.

On the right you see a flame symbol and the word 'heater'. The flame symbol is to turn on the fireplace. The 'heater' is the button to turn the heating unit on or off. Both are orange when on and grey when off.

2.1 ADVANCED CONTROL MENU

When you press the name of the fireplace you will go to the advanced control menu, see [Figure 2.2](#).

- A. **Target temperature:** This is the currently set target temperature.
- B. **Temperature Control:** Move the orange circle to set the target temperature.
- C. **Animation select:** Press the down arrow for a selection menu
- D. **Additional lights:** Press to turn additional lighting on or off
- E. **Main lights:** Press to change the main lighting
- F. **Flame Brightness:** Adjust the slider to change the brightness level of the flames.
- G. **Firebed Brightness:** Adjust the slider to change the brightness level of the firebed lights.
- H. **Animation Speed:** Press to change the speed of the animation.

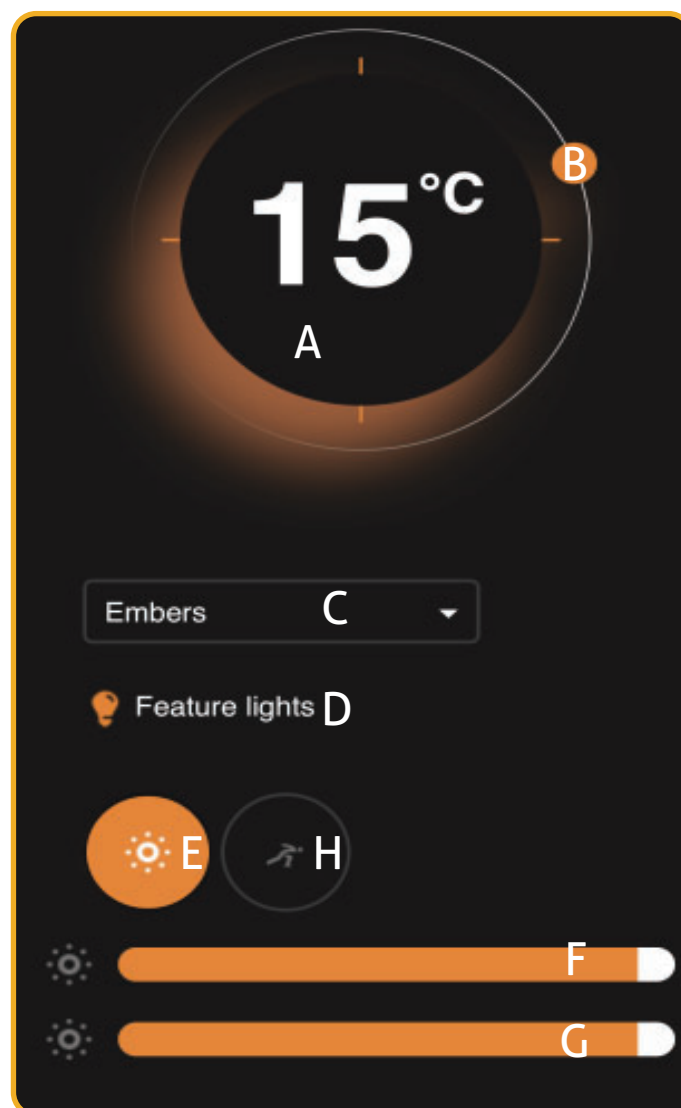

Fig. 2.2 | Advanced control menu

2.2 USING THE TIMER

When you press the clock symbol in the main menu you will go to the timer menu. See [Figure 2.3](#).

1. First press the time field to set the time.
2. Select if you want to fire to turn on or off at this time.
3. Finally select the day for which you want to set this timer.

Attention: de-select all days before pressing save on the timer.

After pressing 'save' you will get an overview off all active times. See [Figure 2.4](#). You can remove a timer by pressing the orange rubbish bin symbol.

Fig. 2.4 | Timer Overview

2.3 SIGNING IN AND OUT OF THE APP

You can sign out of the app by pressing the door sign in the top right.

When you see the login screen on opening the app (like in Figure 2.5) you can log in using the e-mail adress and password used during installation.

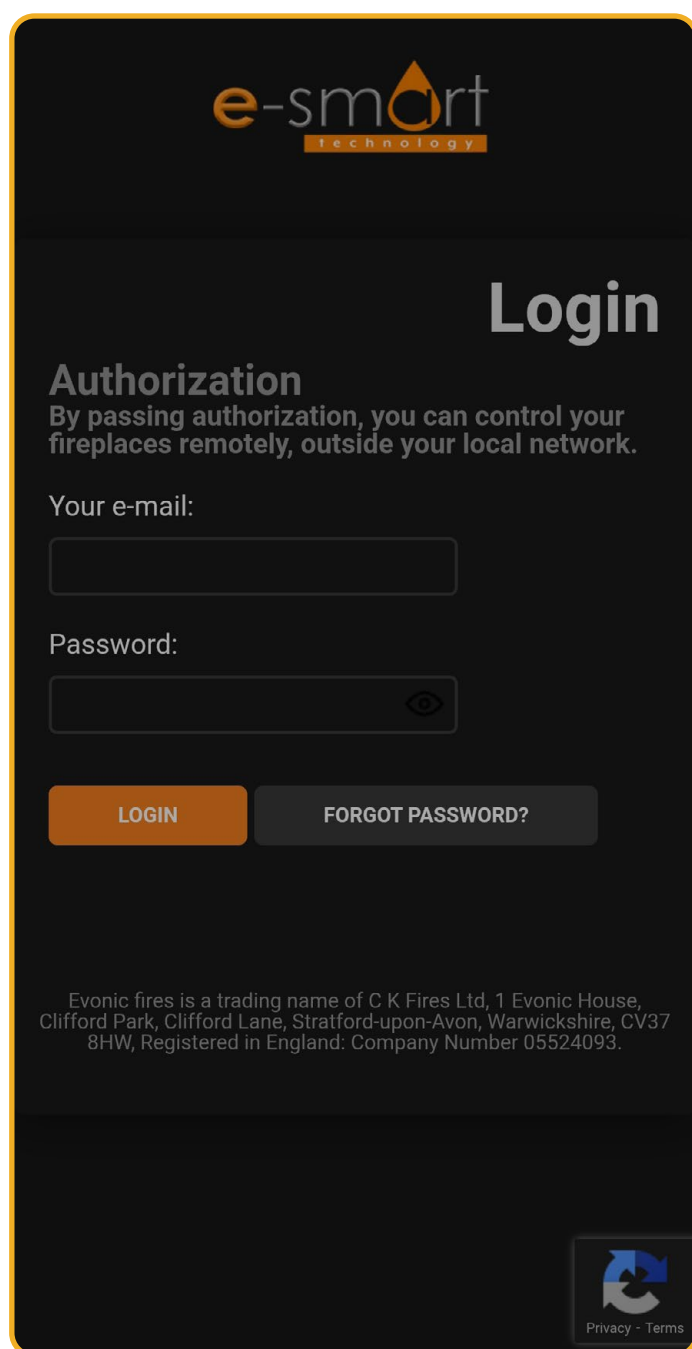

Fig. 2.5 | Login Screen

3 OPERATING THE FIREPLACE WITH ALEXA

Your Elemen4 fireplace can be operated with Alexa using the Amazon Echo.

3.1 PAIRING WITH ALEXA

1. On the Amazon app you will find the menu icon in the top left.
2. Select the Skills and Games in the menu
3. Use the search function in skills and games and look for 'Evonic'
4. You should get the option Evonicfires Halo, like in Figure 3.2.
5. Select this skill and press 'Enable to use'. See Figure 3.3.
6. You should be redirected to a login page. Login using the e-mail adress and password you use for the fireplace.
7. Turn the fire off and on again using the switch on the device.
8. Finalize the pairing by telling Alexa to 'discover devices'.

See CHAPTER 3.2 for commands that can be used with Alexa.

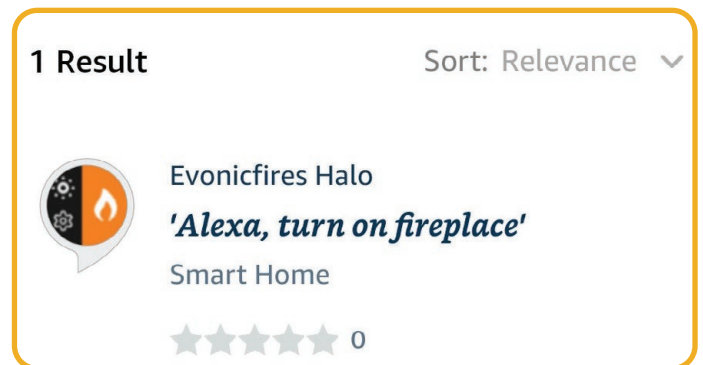

Fig. 3.2 | Fireplace Skill in the search results

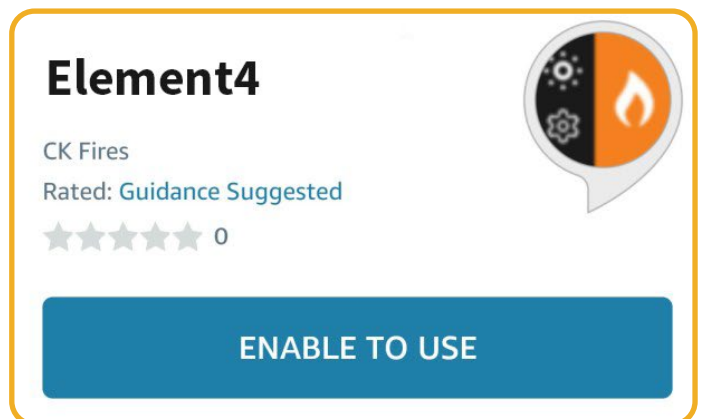

Fig. 3.3 | Instal page for the fireplace

3.2 ALEXA COMMANDS

Below you will find an overview of the Alexa commands that can be used.

Attention: Alexa can only adjust the temperature between 10° C and 32° C.

Turning the fireplace On or Off	'Alexa, turn fire on '
	'Alexa, turn fire off '
Turning the Heating element On or Off	'Alexa, Set fire heater to auto '
	'Alexa, Set fire heater to off '
Adjusting the temperature	'Alexa, set temperature to 25 degrees'
	'Alexa, make it cooler in there'
	'Alexa, make it warmer in there'
Adjusting the Animation	'Alexa, set aniation to still '
	'Alexa, set animation to breathe '
	'Alexa, set animation to spectrum '
	'Alexa, set animation to embers '
	'Alexa, set animation to odyssey '
	'Alexa, set animation to aurora '

4 CONNECTIVITY ISSUES

It may happen that your E-Smart Cloud app cannot connect. The app will then show [Figure 4.1](#)

1. First close the app completely and make sure that it is no longer running in the background via task manager.
2. Then switch the fireplace off and on again with the button on the device.
3. Open the app and try again

If you continue to have problems, please contact customer service.
